Technologies	
	RDS (Radio Data System) Allows your car stereo to display the artist name and song title (Stereo must support RDS).
	ClearScan Live App: The ClearScan Live App gives you the best FM station location and audio quality for your drive, based on your phone's GPS location information. You'll get the best FM scanning technology at the push of a button, and station recommendations from other ClearScan Live users in your area based on your GPS coordinates. You can also contribute to the quality of ClearScan Live's recommendations by rating how well stations work where you are. The ClearScan Live app is available free through iTunes—just download and launch the app from your iPhone.
Amps (A)	Amps (A) The amount of power that is used to charge your phone. The more Amps, the shorter the time to charge.
Connection options:	
	RADIO Find a suitable radio station and enjoy your music + make hands-free calls.
	AUX 3.5 mm plug in your car audio system. Or 3.5mm plug in your iPhone/Blackberry/other phone/other MP3 Player.
	BLUETOOTH Connect via Bluetooth (phone needs to support the A2DP profile).
