USB 2.0 HUB

USB 2.0 Ready!

(Front)

(Back)

Model: UH-275
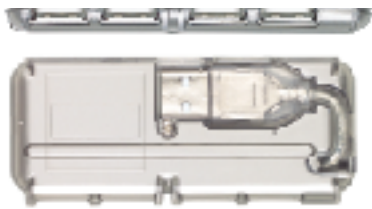

Installation:

1. Make sure that the device you are connecting to is powered off.
2. Pull the hub's USB cable out of its storage compartment, and plug it into your device's USB port.
3. Plug the hub's power adapter into an AC source, then plug the power adapter cable into the hub's power jack.
4. Power On your device. Under Windows, the hub will be detected automatically. If the necessary drivers haven't already been installed, Windows will install them.
5. Plug your USB peripherals into any available port.
