Steal the Show by Presenting Visually Stunning Information

Turn your static Microsoft Excel spreadsheets into engaging data presentations, dynamic charts and graphs, and interactive visual analytics, with award-winning Crystal Xcelsius™. Just point and click. Only Crystal Xcelsius gives you visual modeling, the power to visually analyze multiple "what-if" scenarios, and peer into your company's possible financial future. Then you can easily communicate your results to colleagues, with one-click integration of your interactive Crystal Xcelsius analytics into PowerPoint slides, Adobe PDF documents, and the web.
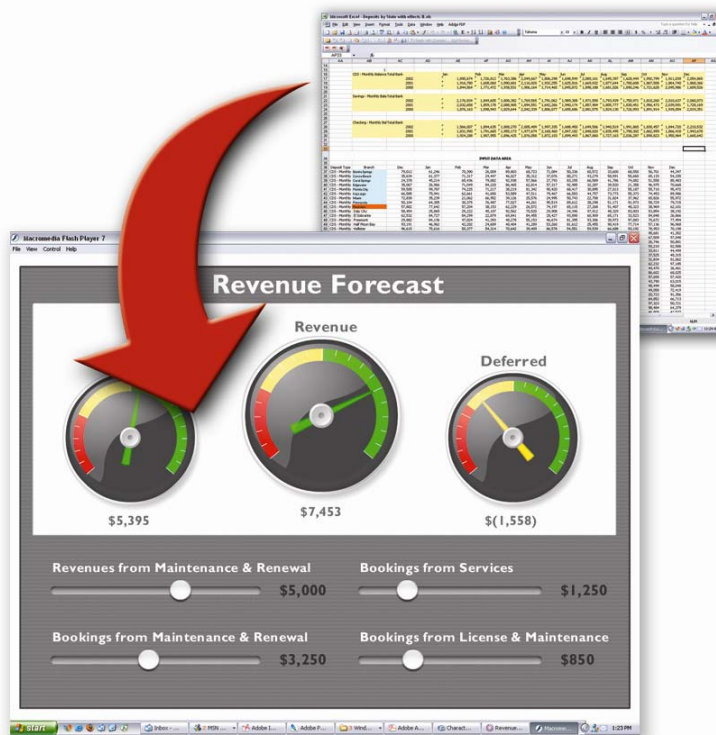

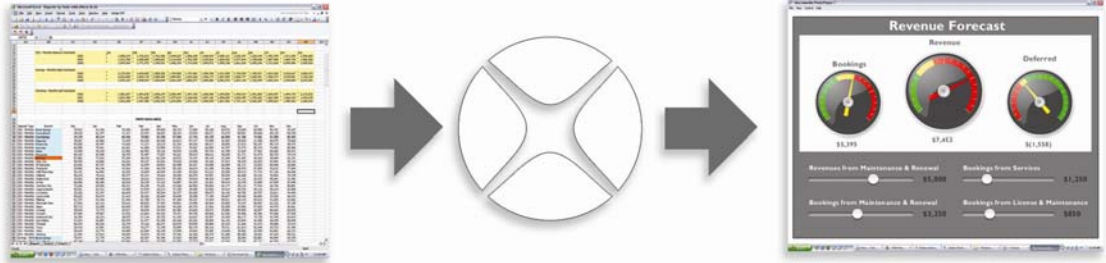

Which Version Should You Choose?

Crystal Xcelsius Professional is for those who want to take their interactive visual analytics to the next level. You receive state-of-the-art information visualization capabilities including:

- Drill-down charts
- Accordion menus
- One-click export to PowerPoint and PDF
- Broad Excel function support
- External slide show
- And more!

Crystal Xceslius Standard is a great way to get started in the exciting area of interactive visual analytics. You get point-and-click ease and all the functionality you need to create unique and innovative data presentations including maps, charts, tools, and extensive customer design capabilities.

Go beyond ordinary spreadsheets. Enter the interactive and visual world of Crystal Xcelsius.

Crystal Xcelsius is an intuitive, standalone Windows application designed to create engaging, interactive visual analytics from ordinary Excel spreadsheets. It is tightly integrated with Microsoft Office products and requires no programming. Crystal Xcelsius uses a simple point-and-click interface to import Excel data and formulas, and output interactive Excel analytics, charts and graphs, financial presentations, and business calculators directly to PowerPoint, PDF documents, and the web.

Business Objects™

# Convert Excel Spreadsheets into Dynamic Analytics

Crystal Xcelsius can convert Excel spreadsheets into interactive visual analytics in three simple steps. Import an existing Excel spreadsheet, create a visual analytic with point-and-click Crystal Xcelsius, and output your analytic to common productivity tools or the web. All with a single click.

Crystal Xcelsius with visual modeling bridges the gap between data analysis and visual presentation, so you can present and interact with business information in ways that were previously unachievable. Crystal Xcelsius gives you the power to create interactive and audience-friendly:

- Excel-based interactive visual analytics
- Dynamic charts and graphs
- Visual calculators
- Pro forma budget models
- Business presentations

Then you can easily communicate your results to colleagues with the Crystal Xcelsius built-in dynamic documents—one-click integration of your visual interactive analytics into PowerPoint slides, PDF documents, Outlook, and the web.

Build powerful and interactive analytics with Crystal Xcelsius.

Crystal Xcelsius Features

Point-and-Click Ease. Includes an intuitive interface with pre-built components, skins, maps, and charts to make it easy for non-technical users to develop fully-interactive visual analytics.

Stunning Presentation. Custom graphics and interactivity allow you to develop and present compelling, yet easy-to-understand financial models and business presentations.

Visual Modeling. Sliders, gauges, filters, numerical input tools and other visual components allow you to quickly evaluate multiple "what-if" scenarios with the click of a mouse.

Dynamic Documents. Easily communicate your results with one-click export of your interactive Crystal Xcelsius visual analytics into PowerPoint slides, HTML, and Adobe PDF.

Platform Independence. Crystal Xcelsius data presentations can run on any PC, Mac, handheld, or other device with the Macromedia Flash Player.

The Best Choice on the Market Today

Crystal Xcelsius provides interactive visual analytics to present data in a more engaging way through PowerPoint, PDF, Outlook, and the web. To learn more about Crystal Xcelsius or other Business Objects products visit our website at www.businessobjects.com.
