Power, Embeddability, Low TCO, Security

Pervasive PSQL v9

For ISVs building and maintaining mission-critical applications for small to mid-sized enterprises, the question is: How do we improve our application without massive rewrites or adding maintenance-heavy features? Pervasive® PSQL v9™ simplifies development and deployment, and improves the performance of your business critical applications. You can now improve productivity while maintaining the investment you've made in your application and infrastructure.

Scalability and Performance

A data management solution's scalability – its ability to grow with you while providing the data you need when and the way you need it – is key to your business success. Pervasive PSQL v9 provides the same dual access database technology as earlier versions with several key improvements:

- **30 separate performance optimizations** impacting all SQL interfaces and resulting in a significant improvements on TPC C benchmarks and joins
- **Support for 128GB tables** (up from 64GB)
- **Faster database access** by doubling page size – now 8K (up from 4K)
- **New bulk data utility** for high performance data import

Low Total Cost of Ownership

Performance is only worthwhile if it's affordable. Pervasive PSQL v9 delivers the same self-tuning engine running 24/7, making maintenance a breeze and virtually eliminating the need for a dedicated database administrator, keeping your business running, and your costs low. Pervasive PSQL v9 improvements continue to drive down support costs and take costs out to make deployments even easier:

- **User notification** of application version conflicts during Pervasive PSQL install helps reduce set up support calls.
- **Improved handling of conflicting registry settings** caused by older applications makes upgrades easier.
- **Improved network communications** allow faster location of server and workgroup engine speeds the installation process.
- **Updates to allow clients to locate servers** in IPX and TCP/IP environments.

Flexibility

Pervasive PSQL v9 provides a wide range of possible configurations and platforms that can adapt to your requirements, maximizing deployment choices by providing:

- **Freedom of choice in platforms** – server solutions for Windows, Linux, and NetWare, along with full function workgroup configurations.
- **Full compatibility with Btrieve applications** on all supported platforms.
- **New support for ISAM data constructs** that means you don't have to alter the data model in your COBOL application to provide SQL access.

Standards Conformance

The Pervasive commitment to open standards is seen throughout the Pervasive PSQL v9 family with support of ODBC 3.5, OLE DB 2.5, and JDBC 2.0-Type IV, and a full suite of development environments. More than 20 new SQL syntax additions mean your application is more easily deployed across multiple platforms.

Embeddability

Pervasive PSQL v9 can seamlessly embed into mission-critical applications, providing the crucial infrastructure on which users rely on to power their success. With its small footprint, easy installation, and low, ongoing maintenance, Pervasive PSQL v9 will be the embedded data management solution of choice for developers across the globe.

A Complete Product Line

No matter your current size, needs, or growth, the Pervasive PSQL v9 product family supports you, by providing everything you need to easily develop, deploy, and maintain even the most advanced client/server and Web applications. The new Pervasive PSQL v9 scales across the wide spectrum of computing environments – from individual workstations to high-volume Web servers.

The Server edition is perfect for both client/server and Web environments. It is the ideal solution for larger departments and growing enterprises that demand the highest level of performance, security, reliability, and multi-platform support.

The Workgroup edition helps you access all your critical data, regardless of where it resides on a peer-to-peer network.

It combines the reliability, security, and performance of the client/server architecture with the flexibility of the workgroup environment, and can also bring the scope and power of the server engine to a single desktop – without compromising quality or performance.

Internet/intranet licensing for road warriors, remote workers, hosted deployments, or Web applications allows you to customize your deployment. With pricing per seat or per processor, Pervasive PSQL v9 can provide the right fit for your needs.

Pervasive data management products are available to provide additional value to our customers. Pervasive AuditMaster™ monitors and reports on all PSQL database activity. Pervasive DataExchange™ allows real-time replication between databases; and Pervasive Backup Agent™ effectively backs up operating databases.

Supported platforms

Server

- Windows NT 4.0 (SP6a or higher)
- Windows 2000/2003
- NetWare 5.1, 6, 6.5 or higher
- Linux (Kernel 2.4 or 2.6)

Client Requestors

- Windows NT 4.0* (SP6a or higher)
- Windows 2000/2003*
- Windows 98/ME/XP*
- DOS 5.0 or higher
- Linux (Kernel 2.4 or 2.6)

Workgroup/Workstation

- Windows NT 4.0* (SP6a or higher)
- Windows 2000/2003*
- Windows 98/ME/XP*

* Supports DOS, Win 16 and Win 32 applications

Strengths and Benefits

- Performance
- Embeddability
- Low TCO
- Security
- Flexibility
- Extensive Standard Support
- Full Suite of GUI Utilities

About Pervasive Software

Pervasive Software is a global value leader in data infrastructure software. The company's award-winning products enable customers to manage, integrate, analyze, and secure their critical data, providing the industry's best combination of performance, reliability, and cost. Pervasive's strength is evidenced by the size and diversity of its customer base, serving tens of thousands of customers in nearly every industry market around the world. With headquarters in Austin, Texas, Pervasive was

founded in 1994 and sells its products into more than 150 countries.
