

## SAMSUNG 2.5" HDD INSTALLATION GUIDE

This product is a precision designed mechanism and is very sensitive to shock and electrostatic discharge (ESD). When storing, please avoid high temperature and humidity and use the original ESD protection package in which the product was shipped at the time of purchase. Please handle the product carefully. Damaged or detached labels or any other components may directly cause product malfunction and void warranty. Samsung does NOT guarantee any data on your drive, please always BACK - UP your precious data.

DO NOT DROP!

DO NOT PRESS!

### 1. Configuring your Hard Disk Drive (Master, Slave)

Master

Slave

Cable / Select

### 2. Installing Your Hard Disk Drive

⚠ Note: Turn off the system power !

*Cover opening mechanism and the location of the hard disk drive may vary from one computer to another.*

- Turn off the computer, unplug the external cables, and open computer cover. Mount the hard disk drive in the designated place in the computer with screws (M3.0).
- Connect interface cable. Make sure that the direction of the cables are correct and matches the shape of the receptacles when connecting cables. Incorrect cable connection may damage the hard disk drive.

### 3. Making Computer Detect the New Device

*Run the CMOS(BIOS) set-up program to detect the new hard disk drive.*

1 Go into CMOS screen during the booting of the computer.

➤ For descriptive details of the program, refer to the computer's user's manual

2 Make the computer detect the hard disk.

1 If your computer supports IDE HDD Auto Detection, the hard disk drive will automatically be detected.

2 If your computer does not support auto detect, go into the User Define Mode and by referring written information on the product, set the correct settings for Cylinder, Head, and Sector and if some Bios must be, set the HDD Mode to LBA.

3 Save the changed details and exit.

### 4. Partitioning and Formatting the Drive

*Refer to your Operating System manual or system manual for partitioning and formatting.*
